Foreword from the Rector

Whether you are a student, researcher, administrative staff or someone interested in training, research, transfer and/or culture, I am pleased to welcome you to the University of Castilla-La Mancha (UCLM).

Located in the heart of Spain, land of Don Quixote of la Mancha and cradle of the Spanish language, the UCLM develops its activity on campuses spread over four of the five provinces that make up the region of Castilla-La Mancha: Albacete, Ciudad Real and the World Heritage cities of Cuenca and Toledo.

I hope this guide will give you the information and reasons that will soon make you want to join this state university. A University where you will find innovative learning opportunities, with places to think and experiment that will lead you to face the uncertainties of a volatile, uncertain, complex and ambiguous world (VUCA world) and to offer answers to the great challenges of the 21st century.

In order to achieve the above, the UCLM offers a wide range of:

- An International Excellence Campus based on the triangle of knowledge: education, research and innovation.
- Tradition and modernity in its open and accessible sites.
- A network of modern and nearby infrastructures that will connect you comfortably and quickly with the rest of Spain.
- Quality multidisciplinary training in an international environment with students from all over the world and a great culture of cooperation.

- With more than 290 research groups and 37 research centres and institutes where you can develop your projects.
- Language training through the Language Center and Confucius Institute, where you can learn not only the languages of the Common European Framework (English, French, Italian, German) but also other languages of interest such as Arabic, Chinese and Japanese.
- Through Spanish as a vehicle for integration, you will achieve multiple employability opportunities to develop in an interconnected global environment, both locally and internationally.
- A cultural, sporting and leisure offer that gives the student the possibility of being part of the institution beyond academic life.

I firmly believe that being part of UCLM becomes a life experience. Meet us and join our University Community of Castilla-La Mancha.

José Julián Garde López-Brea,
Rector, University of Castilla-La Mancha (Spain)

Founded in 1985, the University of Castilla-La Mancha is spread across campuses within four of the provinces of the autonomous community of Castilla-La Mancha (Spain): Albacete, Ciudad Real, Cuenca and Toledo. In addition, the university is present in the cities of Talavera de la Reina (Toledo) and Almadén (Ciudad Real).

Since its foundation as a public institution for higher education and research, our university currently offers 54 bachelor's degree programs and 57 master's degree programs, which are in accordance with the standards of the European Higher Education Area. In addition, UCLM offers a wide selection of postgraduate courses and doctoral programs. The university currently has more than 28,000 students enrolled and a team of about 2,847 professors and researchers. In addition, about 1,147 people make up the administrative and service staff. Besides teaching, research is another fundamental pillar of the UCLM, with more than 290 research groups. UCLM currently collaborates with more than 1,000 regional, national and multinational companies. This joint collaboration is mainly based on the development of research projects that are of interest to both public and private industries.

In addition, each year these companies offer internship programs for students. Currently, more than 4,000 internship programs are offered. Internationally, the university maintains an affiliation with numerous academic institutions throughout Europe, and also with various institutions of higher education around the world. This provides many opportunities to teach and study in a foreign university community. UCLM's geographical location has enabled the university to become a pioneer in the incorporation of new technologies. In addition, UCLM's commitment to excellence can be seen through its excellent reputation as one of the best universities in Spain, as it is ranked in the top fifteen Spanish universities in enrollment, R&D&I funding, and human and material resources, along with having a low dropout rate and more library space for students.

5 key factors of UCLM

international presence

unique and specialized studies

modern and innovative approach

high quality researchers and professors

student-centered

4
campuses

2
university
centres

Toledo

A city with one of the richest histories in Spain. Muslims, Jews and Christians lived together in harmony here for centuries, leaving their indelible mark on Toledo's streets, monuments and buildings. Its old town was declared a World Heritage site in 1986. This center sits majestically above the Tagus River and now represents one of the most visited sites in all Spain.

UCLM has strengthened its presence in Toledo at two different campuses: the Faculties settled in the city's historical quarter and in the old Weapons Factory of Toledo and in Talavera de la Reina, world-renowned for its artistic ceramics, dating back to the 16th century, recognised as Intangible Heritage of Humanity by UNESCO in 2019.

Today, Talavera de la Reina is a modern city that has become an important technological centre, being chosen by leading companies in the sector to set up their offices.

Ciudad Real

Founded by King Alfonso X in the 13th century, Ciudad Real has consolidated as one of the most important cities in La Mancha, the land of Don Quixote. It is surrounded by beautiful natural landscapes included in the list of National Parks.

The Ciudad Real Campus is located in the center of the city and is home to the Rectorate of the University.

About 100 kilometers away from Ciudad Real, in Almadén, stands the Higher Technical School of Industrial Engineering. It is the result of and also the tribute to the city's mining tradition, a mining district which includes the world's largest mercury mine, exploited in a practically continuous way since Roman times. Almadén was declared a World Heritage site in 2012.

Cuenca

A city that touches all your senses. In 1996 Cuenca was declared a World Heritage City by UNESCO, for its wonderful preservation of the original urban setting with its medieval fortress, its rich civil and religious architecture dating from the 12th to the 18th centuries and for the exceptional way the city is embraced by its beautiful natural surroundings. Cuenca is undoubtedly one of the most beautiful cities in Spain, where history, art, culture, urban and natural landscapes can all be found in one place.

The campus of Cuenca is situated on the outskirts of the city with a complex of buildings that preserves the city's historical and artistic heritage, determined by the location of a large part of its facilities in a World Heritage City, integrating advanced technologies.

Albacete

Located in the historic land of La Mancha and it is the largest city in the region. The Albacete campus can be described as a vast area covering public places and green zones, closely tied to the city's urban development and its consolidation in trade and industry. At the Albacete campus, all matters referring to university research and technology-transfer projects are coordinated.

student body

The UCLM provides informative, personalised and support services for students with disabilities, while managing subsidies and scholarships that give students the possibility of participating in internship programmes in various companies.

UCLM Students

The UCLM offers support to its students from the pre-enrollment process to their graduation and subsequent integration into the labor market. To this end, it has several services integrated into its structure, such as the Support Service for Students with Disabilities, the centre for Information and Employment Promotion, the University Counseling Service and the Sports Services. It also manages the organization of admission exams, the processing of scholarships and grants for students and associations and the management of internships in other Spanish universities or institutions. All of this with the aim of facilitating the academic and professional development of its students.

Domestic mobility

The Spanish University centre Exchange System (SICUE) allows undergraduate students to spend part of their studies in another Spanish university. This gives them the opportunity to learn about different teaching methodologies and to enrich themselves with new social and cultural experiences in other autonomous communities.

Employment Promotion and Information centre (CIPE)

cipe.uclm.es / e-mail: cipe@uclm.es

Employment Promotion (CIPE) is to support the professional development of its graduates and improve their job opportunities. To this end, it offers advice and career training, facilitates contact between companies and students, and monitors the professional development of its graduates.

In addition, it promotes entrepreneurship through the UCLM Em-prende programme, which provides training and guidance so that students and graduates can assess the viability of their business ideas and develop their own business projects.

Internships and Employment

practicasyempleo.apps.uclm.es / e-mail: cipe@uclm.es

The UCLM Internship and Employment programme offers stu-

dents the opportunity to gain professional experience in companies or institutions, which helps them to acquire practical skills and improve their employability. These internships allow them to get to know the real work environment and better prepare for their professional future.

Mentoring Programme

The peer mentoring programme at UCLM seeks to facilitate the adaptation of new students through the support of classmates from upper-level courses who act as mentors. These students help new students to integrate both academically and socially, contributing to improving reception policies, quality of service and student participation, as well as reducing university dropouts. This work allows the development of transversal skills such as communication, leadership and problem solving, which are highly valued by employers and improve their employability. Satisfaction with the programme is high, both in usefulness and results.

Support Service for Students with Disabilities and/or Specific Educational Support Needs (NEAE)

www.uclm.es/misiones/laucm/campus/vidacampus/saed

Hay residencias disponibles privadas o financiadas por los goThe UCLM's Support Service for Students with Disabilities (SAED) aims to guarantee the full educational inclusion of students with disabilities or Specific Educational Support Needs (NEAE). To this end, it offers support in accessing and development of university education, promoting equal opportunities and universal accessibility.

Its main actions include compliance with disability regulations, raising awareness among the university community, supporting students in their admission to university and promoting their autonomy. In addition, it encourages teacher training, promotes accessibility in all academic and extracurricular areas, encourages research on disability, improves the employability of these students and promotes inclusive sport.

Escuela Internacional de Doctorado

eid.uclm.es

The International Doctorate School of Castilla-La Mancha is in charge of managing, within its scope, the proper teaching and activities of the doctoral programmes, while developing its own strategy linked to the research strategy of our university. It is organized as an Interdisciplinary School and offers eighteen doctoral programmes for the completion of a thesis, all in line with the current legislation and positively evaluated by the national educational authorities. These programmes cover the five disciplines: Arts and Humanities, Science, Health Sciences, Law and Social Sciences, Engineering and Architecture, and seven of these programmes are offered in collaboration with other

universities in Spain.

On the one hand, it aims to encourage the specialization and internationalization of groups and centers with a proven track record in basic and experimental research, linked to the strategic priorities of the region. On the other hand, it also seeks to promote research in the fields of humanities and social sciences, as these are considered to be the areas of greatest importance regarding the interdisciplinary nature of applied research at our university.

Lifelong learning

Postgraduate Studies Centre (CEP)

cep.uclm.es

The Postgraduate Studies Centre (CEP, for its Spanish acronym) is in charge of the organization, promotion, quality, monitoring and execution of the strategy and offer of postgraduate studies at the University of Castilla-La Mancha, guaranteeing the suitability, quality, competitiveness and internationalization of these studies in the academic and professional fields. The CEP's main function is to respond to the demand for an updated, specialized and quality lifelong learning, helping to transmit knowledge to society.

courses are taught by university professors as well as by professionals of renowned prestige. The objective of professional specialization allows the creation of more than 100 own degrees every year. The specific degrees include the different fields of knowledge (Arts and Humanities, Sciences, Health Sciences, Social and Legal Sciences, Engineering and Architecture) and are taught on different campuses (Albacete, Ciudad Real, Cuenca and Toledo).

Postgraduate studies are becoming increasingly important, offering a high level of specialized training that quickly responds to the needs of the labor market and the interest of students and professionals in recycling and completing their training. These

Internationalization

Language Centre (CEL)

centrodelenguas.uclm.es

The Language Centre (CEL) is firmly committed to promoting multilingualism, not only within the university community, but also in society in general.

The two main lines of action at CEL are language training and language certification. The CEL has a wide range of language courses through its Learn Languages Programme, including face-to-face and online courses in English, French, Italian, German, Japanese and Arabic, as well as courses in Spanish as a foreign language. In addition, the CEL regularly organises certification exams. In English, it offers the CertAcles examinations for levels B1, B2, and C1, awarded by the Association of Language Centres in Higher Education (ACLES). In French, it administers the DELF-DALF exams, with the UCLM Language Centre being the only officially recognised exam centre in the region. For international university students, the SIELE exam is also available, promoted by the Instituto Cervantes in collaboration with other prestigious institutions.

Confucius Institute at UCLM

www.uclm.es/misiones/internacional/inmersion_linguistica/instituto_confucio

The Confucius Institute (CI) at UCLM was established in April 2017. In accordance with the Tripartite Agreement between the Confucius Institute Headquarters (Hanban), the UCLM and Nanchang University, it is a non-profit public institution, whose objective is to promote the Chinese language and culture in the region of Castilla-La Mancha.

The functions of the CI at UCLM include teaching activities, providing support resources and services for teaching, training Chinese language teachers, and organizing official Chinese language proficiency tests such as HSK, HSKK, YCT, etc. Its presence has enabled the people of Castilla-La Mancha to gain access to Chinese language and culture. In addition, it has become a platform for cultural exchange between China and Spain, as well as serving as a bridge that strengthens friendship and cooperation between both countries.

ADRIT UCLM Programme

www.uclm.es/misiones/internacional/proyectos%20internacionales/proyectos%20internacionales/adritStudy

The UCLM has launched the ADRIT program, aimed at attracting, developing and retaining international talent on all university campuses. Within the framework of this educational excellence programme promoted by the Spanish Ministry of Education and Vocational Training as part of its Foreign Educational Action, the initiative includes bonuses on first-year enrollment and individual scholarships for students from the Spanish Bilingual Sections located in Europe and in centres in EU countries and countries with reciprocity agreements on university access (United Kingdom, Colombia and China).

Study Abroad at UCLM

www.bit.ly/UCLM_Study_Abroad

The Study Abroad programmes are an initiative that offers short courses (4 weeks maximum) focused on specific fields of knowledge such as engineering, Spanish language and culture or environmental studies, among many others. The UCLM offers a wide range of these programmes in different disciplines and academic fields.

Spanish courses at UCLM

www.uclm.es/misiones/internacional/inmersion_linguistica/centro-de-lenguas/elefundaciongeneraluclm.es/espanol-para-extranjeros/esto/fundaciongeneraluclm.es/espacu/

The teaching of Spanish language and culture in Castilla-La Mancha is one of the main activities of the UCLM's cultural offer and a key pillar of the university's internationalization strategy. These programmes include general and specialized international courses offered annually, as well as numerous initiatives for learning Spanish language and culture through training programmes in specific areas such as business, engineering, public health, law, humanities, etc.

Intensive Summer Courses | AUNA Programme | Spanish Courses for Foreigners | Spanish Courses for Specific Purposes | Spanish course for the DELE exam (Diploma of Spanish as a Foreign Language) issued by the Instituto Cervantes | Spanish course for ELE teachers.

Moreover, the UCLM was accredited by the Instituto Cervantes, recognition which values the high quality of these courses

Study Abroad courses (all of these courses are designed according to the specific needs of the Universities which could be interested in)

Internationalization at Home (IaH)

COIL

www.uclm.es/misiones/internacional/oferta-internacional/iencasa/coil

Collaborative Online International Learning (COIL) is a learning methodology based on interaction and collaboration between two classes from two countries that develop an activity together. It is an approach that, as part of a class, connects students and teachers from different cultures to learn, discuss, and collaborate with each other. COIL becomes part of the class, allowing all students to have a meaningful cross-cultural experience within their course of study.

The overall objective of COIL is to generate an experience similar to that acquired with international interpersonal learning, but based on online interaction.

BIPs

www.uclm.es/misiones/internacional/oferta-internacional/iencasa/bip

The Erasmus+ Blended Intensive Programmes (BIPs) are short programmes that combine physical mobility (5-30 days) with a compulsory virtual component, using innovative teaching methods.

- They encourage transnational and interdisciplinary cooperation, offering flexible international experiences to students, academic and administrative staff.
- They require a consortium of at least three higher education institutions from different countries and an organizing university that hosts the face-to-face phase.
- Minimum 10 incoming students per programme.
At least 3 ECTS are recognized for UCLM students.

It aims to enrich collaborative learning and knowledge sharing through a combination of face-to-face and virtual teaching.

Erasmusx Programme

confucioclm.uclm.es

Key Actions 1 (KA1) of the Erasmus+ programme focus on promoting the mobility of the educational community, allowing students, teaching and research staff and administrative staff of higher education institutions to carry out learning, teaching or training stays at an international level.

They are divided into:

- KA131: mobility between programme countries (EU and associated countries such as Norway).
- KA171: mobility with non-associated third countries (such as the United Kingdom or Colombia).

Both modalities seek to improve education and training through equity, lifelong learning, teacher development, strengthening European higher education and adapting to the green and digital transitions.

UCLM International Business School

www.uclm.es/misiones/internacional/proyectos-internacionales

It is responsible for the management of Erasmus+ projects in collaboration with other universities, both national and international, which aim to promote cooperation, innovation, excellence and the internationalization of institutions. International Projects (IP) includes the projects Key Actions 2 KA2 (cooperation between organisations and institutions), Key Actions 3 KA3 (support for policy development and cooperation) and Jean Monnet Actions (dissemination of knowledge on European Union integration issues).

IP offers support to the UCLM teaching and research staff in all phases of the project cycle, from assistance and advice in the preparation of proposals to the execution and administrative and financial management.

COLOURS

(COLlaborative innOvative sUustainable Regional UniverSities)

The UCLM is part of the European Alliance of Universities COLOURS, selected by the European Commission in the 2023 call. This alliance integrates 9 universities from 9 countries, totaling more than 126,000 students and 12,300 employees, with the support of 55 collaborating companies and institutions.

Among the objectives of the alliance are the creation of European inter-university campuses, joint curricula, the promotion of multilingualism and our hallmark: regional commitment. To implement strategies in education, research, innovation, and service missions to society, we are developing challenge-based approaches, hackathons, living labs, and entrepreneurship support.

- Welcome and orientation seminars for international students
- Annual celebration of the International Student Day
- Organization of the Erasmus Staff Week for our service staff

The Confucius Institute from UCLM, one of the eight Confucius Institute of Spain

Research

The UCLM stands out in tourism and veterinary sciences. According to the ARWU ranking, UCLM's Veterinary Sciences are in the 151-200 range in the world, while in Tourism, UCLM is among the 101-150 best universities in the world.

The UCLM made an important commitment to research through the implementation of an ambitious Research Plan that integrates actions in terms of human resources and financing of the activity of the 290 research groups at our institution. Within the Recovery, Transformation and Resilience Plan, 18 subprojects are managed in 2024 with a total of more than 30 million euros.

The UCLM committed to improving its Human Resources policies following the European Charter for Researchers and the Code of Conduct for the recruitment of researchers. A working group was created made up of representatives of the governing bodies of the university, as well as different units and services of the UCLM, together with teaching and research staff and PIs with different levels of research experience (R1 to R4) attached to various centres and departments across all branches of knowledge to ensure maximum representativeness, analyze research contracting practices and propose improvement actions, which were reflected in the first Action Plan. The HRS4R seal was approved by the CE in January 2019 and renewed in 2021.

These actions have boosted the positioning of the UCLM in the different rankings.

The 2024 edition of the Academic Ranking of World Universities known as the 'Shanghai Ranking' places the University of Castilla-La Mancha (UCLM) in the 701-800 range of the best universities in the world. It also occupies 23th place, in the range 14-20, among the 80 or so Spanish universities. Reforms and changes in research policy over the last ten years have facilitated greater collaboration with other research institutes. With these links, research can be carried out both outside and within the university.

The UCLM is in an excellent position in the main national and international rankings that include R+D+i indicators. This is due to the support of emerging research groups, the training of our staff, and the number of grants awarded to increase the number of researchers in relevant international institutions. In addition, technical and financial advice is offered to promote the participation of the UCLM in European competitions. Finally, another key factor is the UCLM shares the development of technology with the public and private sectors.

4 key factors in research at UCLM

The recruitment of high-skilled staff in the last fifteen years

Proactive training policies for teachers and researchers, including opportunities to carry out research projects at prestigious international and national research centres

Attainment of the necessary funding for research projects, mainly from the ERDF and from other competitive grants

Good management of research projects

37 research centres

Toledo	Centre of Consumer Studies (CESCO) / Centre of European Studies / Centre of Social Healthcare Studies (CESS) / International Centre for Fiscal Studies (CIEF) / Toledo School of Translators / Institute of Environmental Science (ICAM) / Institute for Nanoscience, Nanotechnology, and Molecular Materials (INAMOL) / Institute for Applied Research in the Aeronautics Industry (INAIA).	
Ciudad Real	Centre of Ibero-American Territorial Studies (CETI) / European and Latin American Centre for Social Dialogue (CELDS) / Regional Institute for Applied Scientific Research (IRICA) / Imagro Institute of Classic Theatre / Institute of European and International Criminal Law / Institute of Applied Geology (IGeA) / Institute for Energy Research and Industrial Applications (INEI) / Institute of Mathematics Applied to Science and Engineering (IMACI) / Institute for Conflict Resolution (IRC) / Institute of Chemical Environmental Technology / Institute of Information Technologies and Systems / Enrique Castillo Institute for Research in Civil Engineering and Architecture (IEC) / Combustion and Atmospheric Pollution Research Institute (ICCA) / Construction Institute / Research Institute for Hunting Resources (IREC).

University life

At the UCLM, there is an intense cultural focus on all of the university campuses. The university continuously holds exhibitions, concerts, lecture series, cinema club, and book readings. There are cultural classrooms located on the campuses to promote cultural activities and the participation of the general public.

UCLM students

The University of Castilla-La Mancha (UCLM) promotes intense cultural activity on its campuses, organising concerts, conferences, film clubs, exhibitions and workshops. Its Summer Courses, which complement academic training with the participation of national and international experts, stand out. In the field of sports, the Sports Service promotes recreational and competitive programmes, with around 7,000 participants and a presence in national and international competitions. In addition, the UCLM promotes the conciliation between studies and sport, offering collaboration scholarships. Its Volunteering Programme seeks to raise awareness and engage the university community in solidarity initiatives, including actions in rural areas to combat depopulation. The Centre for Cultural Initiatives supports cultural dissemination through workshops, meetings and events that enrich university life.

Cultural Initiatives Centre

The University of Castilla-La Mancha counts on the participation of the Centre for Cultural Initiatives to promote the cultural activities in the university world. The main aim is to spread the culture and acquire knowledge for students through: workshops, meetings, concerts, conferences, expositions or different cultural activities.

Volunteering Programme

The Volunteering Programme of the UCLM aims to promote awareness and participation of the university community in solidarity initiatives. It seeks to promote social transformation and strengthen the relationship with regional organisations, especially in rural areas, to combat depopulation. In addition, through the European Solidarity Corps (ESC), it offers volunteering opportunities both nationally and internationally, responding to social and humanitarian challenges, and providing young people with an educational experience that contributes to a more inclusive society.

University Debate League

The UCLM organises the University Debate League on all its campuses, with 15 editions held. Its aim is to encourage dialogue and the defence of ideas in public, developing skills such as information analysis, oral expression and teamwork.

Summer Courses

The Summer Courses complement our university disciplines, offering perspectives that are not addressed during the academic year. They involve lecturers and researchers from other universities and research centres, as well as personalities from cultural, political, artistic, scientific and literary life, encouraging the exchange of knowledge, positions and ideas. This proposal is open to the whole community and is a learning complement for our students and their academic development.

University Sport

In the field of sport, the Sports Service organises recreational and competitive activities with around 7,000 participants, including the internal Rector's Trophy competition and national and international events organised by EUSA (European University Sports Association) and FISU (International University Sports Federation). In addition, the UCLM promotes the reconciliation between studies and sport through scholarships and specific programmes that facilitate participation in federated competitions.

José Saramago 50 Plus University Programme

On the other hand, the José Saramago 50 Plus University Programme offers training for the students over 50, with subjects in various disciplines and complementary activities such as workshops and conferences. Thanks to the support of the Regional Ministry of Social Welfare, it has been extended with the 'Get to Know Your Region' initiative.

Development Cooperation Grants

The UCLM promotes an annual call for grants for development cooperation projects in teaching, research and knowledge transfer. These projects seek to improve the training and quality of life of vulnerable communities worldwide and in Castilla-La Mancha. NGOs, foundations and non-profit organisations can benefit, as long as they have the support of a member of the university community, whether teaching staff, management staff or undergraduate, master's or doctoral students.

Facilities and heritage

Heritage

Despite its youth, the University of Castilla-La Mancha boasts a rich historical and artistic heritage on its campuses. Our University has campuses in three World Heritage Sites: Almadén, famous for its mining complex; Cuenca, which has a wonderful old town, and Toledo, one of the most visited cities in Spain.

In Toledo, several academic institution centres are found in architectural gems such as the convent of San Pedro Mártir, Lorenzana palace or Sabatini building. Our unique buildings are a testament to the history of Spain. All of them have been renovated over the years, but they have always maintained their charm with the purpose of hosting the educational and research activities of UCLM.

In Albacete, the most populated campus in Castilla-La Mancha, university students can enjoy spacious green areas and one of the most accessible urban designs in Spain. Modernity and tradition go hand in hand in this city.

Moreover, the Ciudad Real campus is located in the only province of Spain that has two national parks, two essential getaways for those who live this modern, accessible, and well-communicated university city.

In addition, UCLM houses a large collection of important paintings, sculptures, photographs, drawings and other historical items of interest at UCLM.
